DETAILED ACTION

Status of the Claims

Claims 4-5, 8 and 10 are pending.

This is in response to applicant's election filed on 10/10/07.

Response to Restriction

Applicant's election without traverse of Group II, claims 4-5, 8 and 10 in the reply filed on 10/10/07 is acknowledged.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Information Disclosure Statement

Receipt of the Information Disclosure Statement filed on 03/01/05 is acknowledged and has been entered into the file. A signed copy of the 1449 is attached herewith.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8, a process claim, should not depend on claim 4 (a compound claim) for any definition since the two claims (compound and process) are independent and distinct.

Claim 10 is indefinite because the claim is dependent on cancelled claim 3. The claim is being interpreted as being dependent on claim 1. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-5, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Oshiro et al., (U.S. Patent 5,006,528). See column 11, lines 8-9.

Applicants claim aripiprazole methanolate, and a process for preparing the said compound comprising dissolving aripiprazole in a suitable solvent such as methanol, and then subsequently isolate the salt.

Oshiro et al., disclose an aripiprazole compound and process of preparing the compound. Again, see column 11, lines 8-9 for the compound and column 11 bridging column 12, lines 1-23 for the process for preparing the compound.

It is also noted that the reference discloses that alcohols such as methanol can be used to isolate the salt. See column 5, line 1-5.

However, with identical disclosure of compound, applicants must show that their crystalline form really is different from any of the ones prepared in the prior art. See MPEP 2112, which states, "Something which is old does not become patentable upon the discovery of a new property. The claiming of a new use, new function or unknown property, which is inherently present in the prior art, does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 U.S.P.Q. 430, 433 (CCPA 1977)." Note the dissolving step with ethanol to obtain the salt in column 11, lines 5-14.
